Recent B.Tech CSE (AI/ML) graduate with hands-on product and AI systems experience inside **Enterprise FinTech SaaS**. At HighRadius (Order-to-Cash SaaS), independently identified two operational gaps — built MVPs that drove **27 net-new discovery calls and MCR 15% above team floor**, and designed Athena, an **LLM-powered conversation intelligence platform** with deterministic grading and human-in-the-loop routing. Also shipped a RAG-grounded BFSI research platform and redesigned a clinical decisioning workflow reducing manual effort 50–70%. Comfortable writing PRDs, running user research, collaborating with engineering, and tracking feature adoption post-launch.

EXPERIENCE

ABM Intern — AI Products & Internal Tools

Sep 2025 – Jan 2026

HighRadius · Hyderabad · Enterprise FinTech SaaS (Order-to-Cash, AP Automation)

Athena — LLM-Powered Conversation Intelligence Platform

- Identified call auditing was **100% manual, covering <15% of calls**. Defined the product spec — wrote **10-point scoring framework** with explicit acceptance criteria; collaborated with engineering to evaluate Gemini LLM output quality, define prompt strategies (Temperature 0.0), and implement human-in-the-loop routing for edge cases.
- Validated prototype uplift in audit consistency; reduced senior reviewer time on low-risk calls. Shipped with structured feature demo to internal stakeholders.

Sales Playbook — User Research → PRD → Measured Outcome

- Ran product discovery: observed SDRs context-switching across 4–5 tabs during live calls — diagnosed root cause as cognitive overload, not a training gap. Translated finding into a consolidated single-screen platform spec, built with engineering.
- Validated with new-rep cohort: **27 net-new discovery calls, MCR lifted >15% above team floor**.

Product Management Fellow

Apr 2026 – Present

Next Leap PM Fellowship · Remote

- Ran **30+ structured consumer surveys and 5 in-depth interviews** on ChatGPT voice adoption in India; applied barrier analysis and segment decision matrix.
- Key reframe:** 65–70% cited loss of control — not accuracy — as the #1 blocker. Built **KPI tree** (Discovery × Activation × Trust × Engagement); identified 5 UX gaps; delivered prioritised roadmap targeting **2% → 6% adoption**.

PROJECTS

SIF Copilot — RAG-Grounded BFSI Research Platform

2026

[Demo Link](#)

- Built source-grounded AI platform covering India's Specialised Investment Funds — mapped 30+ strategies across 10+ AMCs, indexed thousands of SEBI/AMFI pages. **Core design principle:** in financial products, confidently wrong data is worse than missing data — AI cites every source and defers on high-stakes queries.

Pre-Authorization Workflow Redesign — LOS-Adjacent

2025

- Redesigned end-to-end decisioning pipeline — **intake → risk scoring → approval routing → outcome tracking** — mirroring LOS module architecture. Introduced early-risk flagging pre-submission; automated via n8n. Wrote full PRD with user stories and acceptance criteria. Reduced manual effort **50–70%** across 100+ daily submissions.

AI Resume Screening — Agentic Pipeline & PRD

2025

- Wrote full PRD with user stories and acceptance criteria; built LLM scoring pipeline with explainable evaluation (skills, experience, domain fit). Automated JD ingestion → scoring → human-review routing via n8n — **50–70% reduction** in manual effort across 100+ daily submissions; zero auto-rejection on ambiguous cases.

SKILLS

Product	PRDs · User Stories · Acceptance Criteria · User Research · Journey Mapping · RICE · KPI Trees · Feature Adoption Tracking · UAT/QA · Systems Thinking
AI / LLM	LLM Integration · Prompt Engineering · RAG · Conversation Intelligence · Human-in-the-Loop Design · n8n Automation
Analytics	Agentic Pipelines SQL · Python (Pandas, NumPy) · EDA · Statistical Analysis · Power BI
Tools	Figma · Whimsical · Notion · Jira · Confluence · Google Slides · GitHub
EDUCATION	

SRM Institute of Science & Technology, Kattankulathur

Graduated May 2026

B.Tech — Computer Science Engineering (AI/ML specialisation) · CGPA: 8.53 / 10

Next Leap PM Fellowship

Apr 2026 – Jul 2026

Product analytics, user research, metrics, PRD writing, and data-driven decision making · Remote
